Expectations for Learning Online
with the Enrichment Program

- Students must have internet access to utilize Zoom.
- See recommended Zoom system requirements.
- Cell phones do not provide adequate Zoom features and are not recommended for online access to classes.
- Regular classes are not recorded due to privacy issues.
- The Zoom link you receive for your class is intended for your use only and may not be shared with others. This protects the integrity of the program and provides against the threat of unregistered participants.
- Please be advised that some technical issues are out of our control. If an instructor experiences technical issues that prevent the class from taking place as scheduled, the Enrichment Program will explore all possibilities for a make-up session.
- We highly recommend you test Zoom before your first class.
- Most courses will be delivered on a Zoom classroom platform enabled with popular Zoom features including, but not limited to: chat, mute, breakout rooms, polling, etc. Students will initially be held in a waiting room while attendance is taken, and then admitted to class.
